SECTION – D

12. Answer the following questions (Compulsory) :

(1×12=12)

One of the workers, Sunil Pawar is a worker in the Production Department and works as a driller. He is in the company for past five years and all the while he has been working as a driller only. His record of service has been generally good, except for one warning for remaining absent for two days without permission. In the early years of service, he used to be rude to his superiors and quarrelsome

with his co-workers. But there is nothing about this on the record, because no serious view was taken about this by the superiors. In the past eight months, since the new management took over the control of Neptune Engineering Company, there is a change in the policy. The new management has taken a stricter approach in enforcing discipline.

One day, at 8 p.m., at the time of starting of the shift Sunil went to his supervisor saying that some guests has arrived unexpectedly at his house in the morning and he wanted leave for that day. The supervisor told him that since few more workers were already absent in the Department he could not grant him, leave. Instead he asked Sunil to work on the press machine. On that day because the regular press operator had not come and there was a large backlog which must be cleared today. Sunil declined to obey the instruction. He said, "I will work on my machine only and not on any other machine", and he went to his usual drilling machine. After some time he left a leave application on the supervisor table. He was not seen on the shop floor throughout the day.

The supervisor had reported the case to his manager and the manager wants your opinion as the Senior Consultant to the company.

Questions :

- 1) Identify the problem in this case and comment on the events that have taken place.
 - 2) Suggest the course of action for the above problem.
-
